# **SAFEGUARDS & SAFETY MEASURES**

**Non-destructive tests (NDT)** are test methods which are used to examine the hardened concrete structure for their suitability for its intended use without interfering in any way with the integrity of the material or its suitability for service

**Light Detection and Ranging(LiDAR)** technology, utilizes light to in order to create a map of almost any kind of physical environment.

**Geographic Information Systems (GIS)** store, analyze, and visualize data for geographic positions on Earth's surface. Many different types of information can be compared and contrasted using GIS.

**Photogrammetry Survey** is a branch of surveying in which maps are prepared by photographs taken from ground or air stations.
